

HOW TO ORDER DLCO GAS FOR YOUR EASYONE PRO/PRO LAB

Dear Valued Customer of NDD Medical Technologies,

We hope you were pleased with the performance of the DLCO gas which NDD used for the purposes of their demonstration. As a dedicated provider of medical and specialty gases and equipment, TMG understands the importance of purity, and we strive to offer the highest quality medical grade gases in the industry.

TMG is proud to be a partner of NDD Medical, and we hope to establish that same relationship with you. We welcome you to contact our Inside Sales Representative to discuss your best medical gas supply and delivery solution for your individual practice.

To get started please call Liliana Medrano or Candace Bourque at (979)774-4492 ext. 815 or Toll Free at (800)720-1563 ext. 815

setup@tmgco.com

Please also keep in mind that any NEW gas customer (DLCO) will need about 3 weeks to be set and delivered. The gas we use is not something that is ever kept in stock. It is usually made up on demand. I would strongly suggest always keeping 2 tanks and order another when you go through one so you have no down time. Once you know you will be purchasing this machine call TMG immediately to get a local gas company account set up.
